

Specifications	
Precision grade	JIS grade N9 (JIS B1702-1: 1998) JIS grade 5 (JIS B1702: 1976)
Reference section of gear	Normal plane
Gear teeth	Standard full depth
Normal pressure angle	20°
Helix angle	45°
Material	CAC702 (formerly JIS A1BC2)
Heat treatment	—

51

- [Caution on Product Characteristics]
- When mating screw gears made of the same material they may cause abrasion and scoring. It is recommended to mate Screw Gears composed of different materials.
  - The allowable torques shown in the table are the calculated values according to the assumed usage conditions. Please see Page 327 for more details.
  - The backlash values shown in the table are the theoretical values for the backlash in the normal direction of a pair of identical gears in mesh.
  - For offset shaft applications, match a RH with a RH, or LH with a LH, to make a set of screw gears. For parallel shaft applications, mesh opposite hands (RH and LH) of helical gear sets. See Page 326 for more details.
  - If the bore diameter is less than  $\phi 4$ , then the bore tolerance class is H8. If the bore diameter is  $\phi 5$  or  $\phi 6$ , and the hole length (total length) exceeds 3 times the diameter, then the class is also H8.

\* For products not categorized in our KHK Stock Gear series, custom gear production services with **short lead times** is available. For details see Page 8.

- [Caution on Secondary Operations]
- Please read "Caution on Performing Secondary Operations" (Page 32) when performing modifications and/or secondary operations for safety concerns. KHK Quick-Mod Gears, the KHK's system for quick modification of KHK stock gears is also available.
  - Avoid performing secondary operations that narrow the tooth width, as it affects precision and strength.

### GCU-N Screw Gear Kit

Installation : Nonparallel and nonintersecting gears  
 Gear Type : Screw Gears  
 Gears : SN2.5-10R  
 PN2.5-10R  
 Gear Ratio : 1  
 Weight : Approx. 1kg

Screw Gears are helical gears used in nonparallel and nonintersecting situations. Applications include devices like conveyers with light loads.
