

Specifications	
Precision grade	KHK R 001 grade 4
Reference section of gear	Normal plane
Gear teeth	Standard full depth
Normal pressure angle	20°
Helix angle/direction	19° 31' 41" right helix
Material	S45C
Heat Treatment	—
Tooth hardness	(less than 194HB)
Surface treatment	Black oxide coating

- [Caution on Product Characteristics]
- The allowable forces shown in the table are calculated values according to the assumed usage conditions. Please see Page 190 for more details.
 - Please use the SHE Helical Gear for the mating pinion.
 - After attaching the racks to the base, please fasten with dowel pins. Clamping only with mounting screws could possibly cause the screws to be broken, due to a heavy load.
 - These gears produce axial thrust forces. Please see Page 167 for more details.

- [Caution on Product Characteristics]
- The allowable torques shown in the table are calculated values according to the assumed usage conditions. Please see Page 190 for more details.
 - The backlash values shown in the table are the theoretical values for the backlash in the normal direction of SRHEF Helical Racks with the same pitch.
 - These gears produce axial thrust forces. Please see Page 167 for more details.

- [Caution on Secondary Operations]
- Please read "Cautions on Performing Secondary Operations" (Page 194) when performing modifications and/or secondary operations for safety concerns. KHK Quick-Mod Gears, the KHK system for quick modification of KHK stock gears, is also available.
 - Avoid performing secondary operations that narrow the tooth width, as it affects precision and strength.
