

Specifications	
Precision grade	JIS grade N9 (JIS B1702-1: 1998) JIS grade 5 (JIS B1702: 1976)
Gear teeth	Standard full depth
Pressure angle	20°
Material	S45C
Heat treatment	—
Tooth hardness	less than 194HB

T1

Catalog No.	Module	No. of teeth	Shape	Internal dia.				Allowable torque (N-m)		Allowable torque (kgf-m)		Backlash (mm)	Weight (kg)

[Caution on Product Characteristics]

- ① The backlash values shown in the table are the theoretical values for the normal direction for the internal ring in mesh with a 30 tooth SS spur gear.
- ② The allowable torque shown in the table are the calculated values according to the assumed usage conditions. Please see Page 182 for more details
- ③ Please check for the involute interference, trochoid interference and trimming interference prior to using internal gears.

[Caution on Secondary Operations]

- ① Please read "Caution on Performing Secondary Operations" (Page 32) when performing modifications and/or secondary operations for safety concerns. KHK Quick-Mod Gears, the KHK's system for quick modification of KHK stock gears is also available.
- ② Avoid performing secondary operations that narrow the tooth width as it affects precision and strength.

\* For products not categorized in our KHK Stock Gear series, custom gear production services with **short lead times** is available. For details see page 8.
